

GRANITE·WARE

Better Browning Bakeware

Better Results Faster

*Designed to brown better, faster and at lower temperatures –
saving homemakers time and energy
while yielding outstanding results*

Granite•Ware® Better Browning Bakeware – a specialty line of porcelain-over-steel bakeware that delivers exceptional results with minimal effort. This unique bakeware is designed for bakers who desire perfect golden-browned edges and consistently crispy crusts on their pies, cakes, cookies, breads and muffins. Why is it better? The dark porcelain exterior efficiently absorbs the oven’s radiant energy. The steel core not only adds strength, it evenly distributes the heat throughout the pan. The porcelain surface is inert and non-porous so baked foods brown evenly without sticking. Because of this natural non-stick benefit, there is no need for added fats or oils that make a crust soggy. There are no PTFE, PFOA or other harmful chemicals used in our process. The materials used are all organic, recyclable, and will never alter the taste of the food baked in them. Better Browning Bakeware browns better, faster, and at lower temperatures than typical stamped and chemically coated pans. Save time and energy while yielding outstanding results – now that’s Better Browning. All Better Browning Bakeware is dishwasher and metal utensil safe – and proudly made right here in the U.S.A.

Brownie Pan
F0620
11 in x 7 in x 1.5 in
Case Pk: 4

Square Cake Pan
